

LONDON INTERNATIONAL
PATIENT SERVICES

Your connection to London's
leading consultants.

We ensure the
best care. Always.

Our company was born from the belief that international patients should be able to secure high-quality, individualised healthcare through a single point of contact – us. At London International Patient Services (LIPS), we are committed to providing high quality specialist care for international private patients seeking treatment in London.

As doctors, we pride ourselves in being able to utilise our extensive medical experience and network to ensure patients receive the best care from our leading consultants at London's top private hospitals.

We manage all aspects of your treatment.

We are an innovative company based in London comprised of eminent doctors practicing in world-renowned London teaching hospitals. Our consultants pride themselves in the skilled management of complex cases at outstanding hospital facilities.

Our patients find it reassuring that the company is managed by doctors who not only know their way around the British healthcare system, but are also world leaders in their respective fields. These key consultants form the backbone of our company.

You will soon discover the distinct advantages of undergoing treatment through LIPS. Each of the London hospitals we are affiliated with are Centres of Excellence where patients receive the highest standards of care from our dedicated medical teams.

The hospitals are renowned for excelling in specific areas including:

- Cardiac surgery
- Paediatrics, pregnancy & childbirth
- Neurology
- Stroke & brain injury rehabilitation
- Orthopaedics & Cancer

Here are some of the many hospitals we are affiliated with: The London Clinic, The Harley Street Clinic, London Bridge Hospital, Guy's and St Thomas's Hospital, King's College Hospital, Princess Grace Hospital, The Wellington Hospital, Bupa Cromwell Hospital, Royal Free Hospital, The Royal National Orthopaedic Hospital and The BMI London Independent Hospital.

We look after self-paying and insured private international patients as well as hospital referrals and government sponsored patients. We also welcome referrals from medical repatriation companies and businesses looking to organise first-class treatment for their international patients in London without the added bureaucracy.

OUR CLINICAL LEADS

We recognise the importance of subspecialisation within disciplines and its influence on clinical outcome. This is why we are the only private healthcare provider to have developed a speciality specific panel of eminent consultants with a clinical lead.

Each referral we receive is discussed at a case conference headed by the clinical lead. This provides our consultants the opportunity to review cases in a multidisciplinary team setting, discussing various treatment options to determine optimal management and selection of a patient specific consultant.

We offer bespoke healthcare packages for international patients seeking treatment in London.

Our services are flexible and include arranging:

- Face-to-face consultations at world-renowned clinics in London
- Inpatient stay in a comfortable private room at leading London private hospitals
- Patient advocates and medical interpreters
- Hospital transport and medical evacuation and repatriation

You will always be in the safest hands.

We also understand it is not always feasible for patients to travel to London for a consultation. This is why we offer a patient-friendly alternative.

VISITING DOCTORS PROGRAMME

We can provide internationally accredited hospitals abroad with a Visiting Doctors Programme (VDP), providing patients with complex conditions the opportunity to receive high-quality, first-class specialist treatment from leading doctors in the comfort of their own country.

E-CONSULTATION

We have various E-consultation options that are easy to arrange, offering a convenient, cost effective alternative to face-to-face consultations; **email**, **Skype**, **radiology reporting service** and **dermatology image review**.

BESPOKE ARTHROPLASTY

We offer the very latest advance in arthroplasty surgery through our Swiss associates Symbios, providing patients hip and knee replacement surgery using 3D CT planned custom made (bespoke) implants for each individual patient.

- We value the importance of prompt access to the best clinicians.
- We recognise the importance of providing individualised healthcare for our patients.
- We ensure constant open lines of communication between our patients and their doctor

FIRST CHOICE FOR TREATMENT

We offer an efficient streamlined service to access London's distinguished consultants who are committed to providing outstanding specialist treatment. Our extensive network of private hospitals allow us to offer competitive rates for accessing some of the very best units in the world. Whether you are an inpatient undergoing treatment or attending an outpatient appointment, our clinical leads will guide your treatment, ensuring open lines of communication between patients and their treating doctor are maintained as well as with their families and representatives.

We have a fast and efficient referral process that enables confirmation of appointment with one of our Consultant Specialists for any medical referral within 24 hours. Using our network of medical facilities to ensure a quick confirmation for urgent direct admissions, we possess the ability to secure a suitable treatment centre for medical transportation within 24 hours of your request.

Arranging medical treatment can be a stressful and anxious time. Our aim is to ensure a smooth and comfortable patient experience by providing 24-hour support from one of our highly

experienced medical coordinators in all key areas of treatment.

We understand the importance of transparency in communication particularly when it comes to healthcare, and so we guarantee the provision of regular and open lines of communication between our doctors and their patients as well as relatives and representatives.

Patient confidentiality is taken seriously. All information we hold is in accordance with the principles of the Data Protection Act 1998, UK.
